

SPS Minibox

Compact supply or extract air unit

SPS Minibox

The SPS MINIBOX air handling unit is a compact unit available in supply air and extract air versions. The product line includes 5 sizes with airflow capacities ranging from 200 to 2,100 m³/h.

The unit is designed for operation with internal ventilation duct systems. It is intended for indoor installation in a suspended configuration or in a horizontal floor-mounted version on feet. Its compact dimensions allow installation in confined spaces.

As standard, the unit is delivered as a complete, ready-to-operate system. Thanks to its innovative self-supporting design, all essential components have been integrated into the compact casing, including the power and control panel, complete internal wiring operating in a Plug & Play system, and intuitive manufacturer-supplied controls.

Unit components

Energy-efficient EC fans (IE4)

Panel filters

PTC electric or water heater

Metal connection spigots

Full internal wiring Plug & Play

Unit designed to operate with **internal ventilation duct systems**

Basic information

Casing

- Self-supporting unit design without aluminium profiles
- External panels made of Magnelis ZM310 coated sheet steel; internal panels made of galvanised steel sheet
- Internal design in suspended or horizontal version on legs
- Double-panel casing with removable panels
- Adjustable panel clamping force
- Flexible connection spigots finished with a P30 frame, eliminating vibrations and noise transmitted through ventilation systems
- 30 mm unit insulation

Heater

- Water heater
- Connections integrated inside the unit casing, ensuring compactness and safety during transport
- Small dimensions in relation to heating capacity
- PTC electric heater (optional)

Filters

- ISO Coarse >65% (G4)
- ISO ePM10 50% (M5)
- ISO ePM1 70% (F7)

Fans

- High-efficiency EC motors
- Motor operation within the optimum speed range
- Reduced heat emission

Automation

- Integrated control and power distribution panel
- Unit cooperation with peripheral devices
- Plug&Play automation with internal wiring
